

Aluminium Products  
**Roll-On**

# Roll-on

**Stand out from the crowd with this roll-on with aluminium can.** It's a fantastic choice for deodorant and anti-perspirant products.

It's an alternative to glass and plastic roll-on bottles, and it's sustainable.

Possibilities**

# Aluminium Infinitely Recyclable

Aluminium is a modern-day super material when it comes to recyclable packaging, with each bottle and tin able to be recycled again and again without losing quality.

Plus, the enduring metal construction means tins and bottles often go on to have a second life with their owner, storing everything from buttons to bobbins.

A premium finish for any sector, aluminium solutions are ideal for personal care, home care or beverage products.
